AQUAPRO 6000

Whole Home Water Refinement

EXCLUSIVE MULTI-MEDIA BLEND WATER REFINEMENT

- Its AFM underbedding doubles the filtration performance of regular sand filters
- Removes particles up to 1 micron, dissolved organics, and micro-plastics
- Effective removal of bacterial flocs
- Bio-resistant: prevents bacterial growth and biofilm formation
- Self-sterilizing: no bacterial buildup
- High-capacity, Commercial grade resin softens water to zero hardness
- Triple-action filtration by our Bituminous **KleenBlend** carbon, proven to reduce chlorine, chloramines, VOCs, PFAS, heavy metals, and more
- Enhanced taste and odor control
- Carbon surface modified to enhance its catalytic capabilities to promote oxidation, reduction, decomposition, substitution and elimination reactions
- NSF certified media and components

REFINER TANK CONSTRUCTION

- Blow-molded, high-density seamless polyethylene inner shell, with external fiberglass reinforcement and sealed with epoxy resin
- External thermowound fiberglass windings for strength and working pressures up to 150 psi
- Atmospheric break to insulate tank and eliminate condensation
- Highly-polished, exclusive real stainless steel outer protecting cover for a sleek appearance

AQUAKLEEN'S MULTI-FUNCTION REFINER

Experience the next level of water treatment with the Aquakleen State-Of-The-Art Multi-Function Refiner. Our innovative **AFM** glass underbedding offers a unique filtration synergy together with the softening resin and our **KleenBlend** carbon formula.

Incorporating technology developed by NASA, for America's space program, the **AQUAPRO 6000** Multi-Function Refiner let's you enjoy Aquakleen's Water Refiner and all of its benefits at home.

USER-FRIENDLY ELECTRONIC DIGITAL CONTROL VALVE:

- High flatness and strength ceramic disks guarantee excellent sealing
- Electronic backlit display
- Automatically calculates:
  • usage • capacity • reserve volume
- Motor only runs during regeneration
- On screen flow and rate indicator
- Logs how water is used
- Simply set time of day and hardness
- Valve certified by NSF

SYSTEM BENEFITS:

- Uses 50% less salt than comparable systems
- Thorough 5-cycle regeneration
- Full one-inch porting and manifold, allowing full pressure and flow
- Corundum Ceramic disk technology
- Valve operable as low as 25 psi
- Fully automatic operation
- Corrosion resistant

SALT TANK CONSTRUCTION

- Extra high capacity
- Blow-molded, high-density polyethylene with Ultra-Violet inhibitors
- Safety overflow prevention float
- Periodic addition of softening salt required
